

Phases of Certiverse Exam Development*

Steps of the Certiverse Exam Development Phases

Project Kickoff

Define project scope and make exam development decisions.

Steps:

1. Create job role description
2. Define Minimally Qualified Candidate (MQC)
3. Project planning

Job Task Analysis

Subject Matter Experts (SMEs) contribute and evaluate job tasks in the platform.

Steps:

1. Create job description
2. Create JTA
3. Seed tasks
4. Invite SMEs to elicit tasks
5. Elicit tasks
6. Finalize tasks
7. Launch survey
8. Invite survey participants
9. Administer survey
10. Close survey/analyze
11. Publish JTA

Blueprint Creation

SMEs review the blueprint draft that was automatically generated using the JTA data and finalize the blueprint.

Steps:

1. Create blueprint draft
2. Review blueprint draft
3. Finalize blueprint
4. Write description for domains

Item Writing & Review

SMEs write and review items using the Certiverse platform.

Steps:

1. Enable AI-assisted item writing and review (optional)
2. Invite SME item authors
3. Kickoff meeting (optional)
4. SMEs write and review items

Beta Testing and Analysis

Set up and administer Beta exam in the Certiverse platform. Item analysis results are automatically displayed.

Steps:

1. Create beta form(s) (one or more rounds)
1. Beta exam setup and launch
2. Beta exam administration
3. Automated item analysis and classification
4. Select items for use

Standard Setting

Use the Certiverse platform to efficiently perform a modified Angoff study.

Steps:

1. Create or select existing standard setting form
2. Invite SMEs
3. Kickoff meeting
4. Independent asynchronous SME evaluations
5. Reconciliation meeting
6. Finalization of the standard

Form Creation & Equating

Automatically assign & update items within forms per determined criteria.

Steps:

1. Create operational form(s) (one or more rounds)
2. Equating and scoring configuration
3. QA scoring
4. Beta candidate rescore

Exam Launch

Make the exam available on the Certiverse platform and ensure fair and smooth administration.

Steps:

1. Configure Exam Store
2. Choose proctoring model
3. Exam administration and monitoring
4. Exam health checks (every 3-6 months or as needed)

*The exam development timeline above is the schedule recommended and made possible by Certiverse. Exam development phases can be customized to each client as required.
